Case

The Length of the Last Word in a Sentence

Your task is simple, given a **sentence**, find how many characters that the **last word** have.

Input

The program will ask for a single string **sentence**.

Constraint

$1 \leq \text{strlen}(\text{sentence}) \leq 10000$

sentence consists of only English letters and spaces.

There will be at least one word in **sentence**.

Output

Print length of the **last word**.

Example (Print out one '\n' at the end of the results)

Input	Output
"Hello world"	5
" Fly me to the moon "	4
"luffy is still joyboy"	6

Notes

The input does not actually have double quotes.
