Soal

Case

Find Prefix in a Sentence

Given a **sentence** that are seperated by space and a string **search**, find if there are any words in the **sentence** that has **search** as a prefix.

Input

The program will ask for two inputs, string **sentence and search**.

Constraint

1 ≤ strlen(sentence) ≤ 100

1 ≤ strlen(search) ≤ 20

sentence consists of English letters and spaces.

search consists of lowercase English letters.

Output

Print out the **index of the word** in the **sentence** if there are a word that has **search** as a prefix. Otherwise, return -1.

Example (Print out one '\n' at the end of the results)

Input	Output
i love eating burger burg	4
i am tired you	-1
